

Alexo®

It doesn't matter how young you are – or feel – this sunshade will take you back to your youth. Because Glatz has been producing this classic sunshade for over 70 years: Alexo.

Alexo has not changed its appearance over the years. It has been produced with the same timeless design for over 70 years – a real design classic. The shade with flounces gives off a classic vibe whilst the flounce-less Alexo is as modern now as it has ever been. That's the secret of its success.

The top of the shade signals the finest craftsmanship from afar. The finely ribbed gear joint is made from nickel-plated brass and allows the Alexo shade to be angled depending on the position of the sun or personal requirements. The Alexo also offers a lot of different fixing options such as balcony clamps, ground sockets or mobile bases. Whatever you decide, with Alexo you are the owner of an icon of Swiss design.

Teakwood

A genuine design icon:
Alexo.

Materials and technology: Alexo: The pole is made of lacquered ash wood, the gear joint of nickel-plated brass. The cover of the Alexo without flounces is reinforced with leather corner mounts. Piazzino: The pole made of ash wood is equipped with a pulley system. This sunshade has a wind outlet. Teakwood: Made of fine teak, with a double pulley system and rustproof metal fittings. The cover is reinforced with leather corner mounts.

How to operate: Alexo: To open it, hold the sunshade at a comfortable angle and push the slide outwards until it clicks into place. Then angle the sunshade according to the location of the sun, using the finely ribbed gear joint. Piazzino & Teakwood: To open the sunshade, pull the pulley system and fix it using the metal peg.

Winter storage: Store in the protective cover in a dry place that is protected from the wind. Please note: Wood is a natural product and should not be left out in the rain for too long.

Fixing options: Alexo: 30 kg concrete base, 40 kg concrete base, lawn spike, balcony clamp, ground socket with support tube. Piazzino & Teakwood: 65 kg concrete base, ground socket with support tube.

Accessories: Alexo: Protective cover. Piazzino & Teakwood: The protective cover is included in the standard equipment.

Advertising imprint: Individual imprints are possible with Alexo and Teakwood.
