

## Palazzo® M16

**It puts everyone in the shade. Not really a surprise, considering its size. Yet Palazzo M16 comes across as surprisingly light and elegant. A fine palace, which invites you to while away the time. And not just for sun worshippers.**

You needn't be the Sultan of Brunei or a member of the elite Hong Kong Jockey Club to take up residence under a Palazzo M16. You will be in good company, in any case. After all, the Palazzo M16 is part of Glatz's elite group. This success has its reasons. It allows you to create an attractive shade landscape at restaurants, bars or sales stands, lending them an elegant touch.

But it's not just the aesthetics of Palazzo M16 that impress. Cool calculators do pretty soon realize that this sunshade allows them to profitably use their outdoor facilities for a still longer period of time. All this without getting their hands dirty, as the sunshade is opened and closed with the hand crank or the optional motor. As you can see: Palazzo M16 simply fulfills everyone's wishes.

## Palazzo® M16

Impresses in every setting.  
Palazzo M16.

With the hand crank or the optional motor you can open the Palazzo M16 in a very comfortable way. The sunshade can be easily closed over tables and chairs. Thanks to the rotation-proof pole with octagonal profile this strong construction becomes even tougher. The weather strip system allows the replacement of single material segments. Lighting and heating make sure that you can profit from a still longer outdoor season.

**Materials and technology:** The frame is made of pressed aluminium profiles. All the cover parts can be individually replaced. The Palazzo M16 is TÜV tested.

**How to operate:** The shade can be opened and closed using the hand crank or the optional motor.

**Winter storage:** Store on the spot in the protective cover, protected from the wind or, dismantled, in a dry and sheltered place.

**Fixing options:** 580 kg shade base with 12 concrete slabs including fixed support tube, ground socket M16 or mounting plate M16 with tip-over hinge M16.

**Wind resistance:** Depending on the size, the open Palazzo M16, placed in its ground beds, resists wind speeds up to 70 km/h (wind-force 8) or, when closed, to wind-force 11.

**Accessories:** Protective cover, curtain, rain gutter, rain gutter cross (with rain gutter and rain gutter cross of hard PVC you can create shade landscapes where the rainwater flows away between the sunshades).

**Electric accessories:** Motor unit with control unit, anemometer, remote control for motor unit, key switch – surface or flush mounted, radiant heater grey, 1'500 watt (max. 4 units for each sunshade) 400 V (three-phase), lighting P1607 230 V / 4 x 16 watt.

**Advertising imprint:** Individual imprints on shade roof and/or flounces are possible.

**Attention:** The final assembly of the Palazzo M16 has to be carried out on the spot.

Hand crank

Frame

580 kg shade base (12 concrete slabs), welded support tube

Ground socket M16, tip-over hinge M16

Mounting plate M16, tip-over hinge M16
