

Pendalex® P+

Hand crank and locking lever for free-arm fastening

Locking lever for height adjustment and locking lever for rotation by 360°

90 kg concrete base

90 kg granite base

Shade base M4/120 kg (8 slabs), support tube

Ground socket, support tube

Mounting plate M4, support tube

Wall clamp M4 projection of 480 mm, support tube

Wall clamp M4 projection of 100 mm, support tube

Protective cover with zip and rod

Aesthetically and technically brilliant. The tough Pendalex P+.

The modern-looking Pendalex P+ offers you the perfect shade. The incredibly strong technique takes care of that. Thanks to its ergonomic construction, the sunshade can be individually adjusted according to the position of the sun. But it is also a great defender of your privacy. Thanks to the integrated crank, intended both for right- and left-handers, the sunshade can be easily and comfortably opened and closed. The closed sunshade is very space-saving. Furthermore, the roof cover is replaceable.

Materials and technology: Telescopic pole and free-arm: aluminium. Shells: fibreglass-reinforced TSG synthetic material. Guides: teflon-modified high-performance synthetic material. Roof rods: tempered spring steel, galvanized and powder-coated. Glatz ball-and-socket joint: forge-pressed hard anodized aluminium.

How to operate: You open and close the sunshade by means of the crank on the free-arm. The sunshade height may be easily adjusted thanks to the gas pressure spring (50 cm lift) placed in the sunshade pole. The free-arm runs on roller guides and can be progressively extended. The Glatz ball-and-socket joint permits the sunshade roof to tilt in all directions up to 90°. The sunshade roof can be progressively rotated around the pole by 360°.

Winter storage: Pull the protective cover over the sunshade, and store it in a dry and sheltered place.

Fixing options: 90 kg concrete base, 90 kg natural granite base with high-grade steel support tube, shade base M4/120 kg for 8 slabs and support tube, ground socket with galvanized steel support tube, ground socket with high-grade steel support tube, mounting plate M4 with support tube, wall clamp M4 with support tube.

Important: For the sunshade sizes of Ø 300 cm and 285 x 230 cm you need a base weight of 90 kg and for the sizes of Ø 325 cm and Ø 350 cm one of 120 kg.

Accessories: Protective cover with zip and rod, optional rechargeable battery light Osyrión.

Advertising imprint: Individual imprints are possible.

Sizes and weights

10 piece round	Ø 300 / 325 / 350 cm
10 piece rectangular	285 x 230 cm
Total height	226 ... 276 cm
Weight	approx. 22 kg
